

January 12, 2026

Ming-Chieh (Ming-Chieh) Hsu
m0902329118@gmail.com

Dear Ming-Chieh,

Congratulations! On behalf of the faculty, we are delighted to inform you that you have been admitted to the **M.S.E. program in Materials Science and Engineering** in the Whiting School of Engineering at Johns Hopkins University, beginning in the **Fall 2026 term**. You will be joined by colleagues who share your passion and qualifications to create and develop engineering solutions that will change lives around the world.

You have been admitted for the ten-course master's degree program, for which Professor Patty McGuiggan will serve as your academic advisor. If you are interested in the possibility of working towards an eight-course master's degree with a research essay, you will need to identify a research advisor who is willing to accept you as a research student and who would serve as your academic and research advisor. A list of faculty involved in materials-related research and their research interests can be found on the [departmental website](#). The number of such research master's student positions is limited and may not be available to all accepted students. If you have any questions about this option, please contact the department directly. Please be aware that our Ph.D. program has a separate application and admissions process. If, at some future date, you would like to pursue a doctoral degree in our department, you must apply separately to that program.

Costs of Attendance

Full-time graduate tuition for the 2026-2027 academic year is approximately \$66,670.00. It is our pleasure to inform you that you have been awarded departmental tuition support in the amount of \$15,000.00. This support will be applied each academic year of full-time enrollment, subject to annual increases. For more information, please contact your department.

You can view projected expenses below and on the [Whiting School of Engineering website](#). Costs for future years will be similar, subject to an annual increase.

Your Estimated Cost for the 2026-2027 Academic Year*	
Tuition	US\$51,670 (fall/spring semesters: approximate while in a full-time, resident status)
Matriculation Fee	US\$500 (one time)
Health Insurance	US\$3,292 (approximate while in a full-time, resident status. See the Health Insurance section below for more information. Note that there are additional charges for the optional dental/vision plans)
Personal Expenses	US\$1,935 (approximate)
Off-Campus Living	US\$20,257 (approximate)
Books and Supplies	US\$1,589 (approximate)
Total	US\$79,243.00 (approximate)

**Note that if you have been awarded any funds from the program, the estimated costs above reflect the adjusted amount (these amounts are approximately what you will be responsible for per each academic year of full-time enrollment, subject to annual increases).*

Additional Funding Information

- Any funds given to a student over and above tuition, mandatory fees, books, and equipment are subject to taxation. For clarification of tax issues, please contact the [University Tax Office](#).
- If you have received or plan to receive external funding (not personal funds) intended to support your tuition from outside the Johns Hopkins University, you must report this information to your program as soon as you are aware of the external funding.
- Note that summer and/or intersession courses may incur an additional cost. Please consult with your program for more information.

HOW TO ACCEPT THIS OFFER

To accept this offer, please visit the [admitted graduate students webpage](#).

This offer of admission to our graduate program is valid until April 16, 2026. We adhere to the [Council of Graduate Schools resolution](#) regarding admissions offers. This offer of admission is not conditional.

- As indicated on the application, if you are accepting this offer you will be asked to disclose any relevant criminal and/or academic/professional misconduct background information on the admitted student webpage. Disclosure of criminal and/or misconduct history does not necessarily mean there will be an issue with the offer.
- **A non-refundable enrollment deposit of \$600 must be submitted by all incoming students in the Materials Science and Engineering program. The enrollment deposit is due by April 30, 2026.** Upon enrollment, this deposit will be applied towards tuition charges.

Conferred Degree Requirements

If you accept our offer, Whiting School of Engineering graduate students are required to provide all final official transcripts where a degree was earned, with degree conferral, for enrollment in a WSE graduate program. You are required to hold a bachelor's degree or equivalent (as approved by the WSE Dean's Office and the admitting WSE degree program) for continued enrollment in a graduate program, regardless of a higher degree earned.

- Official Transcripts must (1) **include courses, grades, and the degree earned with date**, (2) **be submitted electronically only**, and (3) **be received before the start of your first fall or spring semester enrolled**.
- View detailed instructions on [Submitting Final Documents](#).
- If you do not complete the conferred degree requirement, a registration hold will be placed on your account in advance of registration for the next semester, and **you may not be permitted to continue in the program**.
- Review Whiting School of Engineering's [Admission and Privacy Policy](#) and Johns Hopkins University's [Admissions Revocation Policy \(PDF\)](#) for more details.

Accepting Our offer? Here's a SPECIAL OPPORTUNITY JUST FOR YOU!

Accept our offer and see if you can get a jumpstart on your JHU degree before coming to campus in fall 2026! Save a little money and enjoy some flexibility working on your degree before you arrive at JHU.

- Please ask your program about the **Home to Hopkins** option to see if it would work for you. **Home to Hopkins** allows you to take 1-2 online courses from our top ranked engineering for professionals' online program in the summer (2026) before you travel to campus to start your full-time, residential master's program. These courses would apply to your master's degree if satisfactorily completed. If you choose **Home to Hopkins**, you would only need to pay a per course tuition fee for any online summer term (2026) courses, which means you might be able to reduce your total residential program time and costs to 2-3 semesters (most master's students need 3-4 full-time, resident semesters to complete their degree).

You could save some time and money! Interested? Talk to your program today after you accept this offer to see if you can take advantage of this jumpstart!

Health Insurance Requirements for WSE Graduate Students

It is the policy of Johns Hopkins University that all full-time students maintain adequate health insurance coverage to provide protection against unexpected accidents and illnesses. All full-time graduate students are automatically enrolled in the university

student-sponsored health benefits plan and the plan premium will be charged to your university student account. More information can be found on the [Registrar's Student Health Benefits website](#).

- Domestic students have the option of either staying enrolled in the plan or waiving this insurance plan by providing proof of comparable coverage. Auto-enrolled domestic students who are eligible for a waiver must submit a waiver request form via the [Academic HealthPlans site](#) during the open-enrollment period. Students who do not complete a waiver by the designated deadline, or the waiver submitted has been denied, will remain enrolled in the Student Health Benefits Plan and their student account will be charged for individual coverage.
- International students are **ineligible** to waive and are required to purchase the university plan while they are in the United States.
- Master's students have the option to self-enroll in and pay for a [university dental and vision plan](#).

Pre-Entrance Health Requirements for WSE Graduate Students

All incoming in-person students to Johns Hopkins University must meet certain health requirements before attending. Failure to comply with these health requirements prior to your arrival on campus will block you from adding or dropping classes, interrupt your orientation, and may result in a \$100 health form completion fine. More specific information can be found on the [Student Health and Wellness website](#). Graduate students are required to follow all [health and safety policies](#) in the Whiting School of Engineering and university at large. The university may mandate specific health and safety requirements for certain groups or in certain circumstances if necessary.

VISA Information for WSE Graduate Students

After accepting your offer of admission, the Office of International Services (OIS) will send detailed instructions via email on how to request visa documentation. Students who require an F-1/J-1 visa should begin the process promptly upon receiving that email. Additional information and resources for newly admitted international students are available on the OIS [website](#).

Policies for WSE Graduate Students

Your participation in the graduate program is subject to university and departmental policies, including without limitation [double-counting and transfer credit policies](#) as well as academic progress requirements. In addition to your program's graduate advising policies, please review the [Graduate Affairs](#) website, the [WSE Policy Page for Graduate Students](#) and the [Homewood Academic Catalog](#).

Admissions Revocation Policy

When applying to Johns Hopkins University, applicants certify that the information provided during the admissions process is complete, accurate, and truthful to the best of their knowledge. Should any violations be identified after an applicant has been admitted but before matriculation, admission may be revoked. Grounds for revocation include:

- If any information certified by the applicant is found to be materially incomplete, false, fraudulent, deceitful, or misrepresented.
- If an admitted applicant fails to satisfactorily complete any ongoing academic work at the time the offer is made.
- If the applicant does not uphold the high standards of character outlined in the JHU Student Code of Conduct.

Participation Expectations for WSE Graduate Students

Residential program students (Homewood-based Doctoral and Master's) [may not be simultaneously enrolled in a degree-seeking program at any another university](#). Please note that for students enrolled in the residential graduate program, [there is an expectation to attend classes and conduct research at the Homewood Campus](#) in Baltimore, MD. There is not a full-time remote coursework option for residential programs, and students may need to defer.

Mandatory Graduate Academic Ethics Course Completion (EN.500.603.01)

New WSE graduate students are required to complete the online course EN.500.603.01 Graduate Academic Ethics by the end of their first semester. You will be auto-enrolled in the course EN.500.603.01 by the registrar's office within the first few weeks of the semester, and the course will be part of your official enrollment record and transcript. Upon enrollment, you will be able to access the course via your student Canvas portal. It is a mandatory Pass/Fail course. WSE graduate students cannot graduate without completing the academic ethics course with a passing grade (P).

Required In-person New Student Orientation Information for WSE Graduate Students

New student information (including in-person and virtual orientation information) will be sent by email and posted to the [WSE Student Affairs Website](#).

We strongly encourage you to look at the graduate section of [your program's webpage](#). There, you will be able to find information

on faculty research, faculty and academic staff contact information, general student information, and course listings. Your program will provide additional details regarding degree requirements.

Once again, let us congratulate you for your fine achievements to date, and express our wish that you will continue your excellent work with us as a graduate student in the Whiting School of Engineering. **To accept this offer, please visit the [admitted graduate students webpage by April 16, 2026](#)**. Don't forget to ask your program if you are interested in the Home to Hopkins program as well. If you do decide to join us, you will find an intellectually stimulating environment with high academic standards, excellent research opportunities, and visibility. We are sure that pursuing a graduate degree with us will provide a solid foundation for your future career endeavors.

Sridevi V. Sarma
Vice Dean for Graduate Education and Lifelong Learning
Whiting School of Engineering

Patty McGuiggan, Chair
Master's Degree Program Committee
